Chanchit Lerdwongsuwan

Custom Software Engineering Specialist

Bangkok City, Thailand

Summary

Hi, My name is Chanchit Lerdwongsuwan. You can call me Oat. I
am 29 years old. I am a Full-Stack developer based in Bangkok,
Thailand. I have experience of building Web Applications with
Dotnet / Angular and some cool other libraries and frameworks. I am
very passionate about improving my coding skills and developing
applications and websites. And I hope we can work together on a
project. Thank you.

Experience

IT One

Custom Software Engineering Specialist

October 2021 - Present (3 years 2 months)

Overiew:

As a Custom Software Engineering Specialist, I focus on delivering projects
on time by managing the development process, from design to maintenance.
I work closely with the team, provide feedback, and ensure smooth
communication across all stages of the project. I actively participate in key
meetings and help resolve any technical issues to keep projects on track.

Responsibilities:

Project Delivery: Estimate tasks and project timelines to ensure the timely
delivery of software solutions, and develop both front-end and back-end tasks
according to the project schedule.

Software Development: Design, analyze, develop, and maintain applications in
alignment with business needs.

Task Management: Manage task assignments, monitor progress, and provide
constructive feedback to team members.

Collaboration & Meetings: Actively participate in requirement gathering,
solution design, project kick-offs, and daily stand-ups to ensure smooth project
execution.

Issue Resolution: Research and find solutions to help the project and team members resolve issues.

Buzzebees
